Brunswick Rail, a freight-leasing company operating in Russia, got \$200 million in loans from the European Bank for Reconstruction and Development and commercial banks.

The financing comprises \$100 million of five-year debt from a bank syndicate, and \$100 million for eight years from the EBRD, the development agency said in a statement. Proceeds will be used to purchase more than 5,000 new railcars to help meet growing demand, the EBRD said. ☒
