Ukraine's national oil and gas company, Naftogaz Ukrainy, on July 2 signed a loan agreement with Gazprombank for \$2 billion, Interfax reported Monday, citing web portal Derzhavni Zakupivli.

The cost of servicing the credit facility for seven years (2012-19) will be \$1.54 billion.

Naftogaz will raise the funds at a tender with one participant. The funds will be used to pay for imported Russian gas. At the end of last year, Gazprombank issued a \$550 million loan to Naftogaz to pay for Russian gas.
