The  **Moscow Times**

The country's second-largest lender, state-owned VTB, aims to raise at least 150 million Swiss francs (\$156.36 million) via a four-year eurobond and is guiding investors toward a coupon yield of around 3.2 percent, a banking source told Reuters on Tuesday.

VTB issued a Swiss franc eurobond last year and in 2012 has been actively topping up its outstanding eurobond issues.
