October 17, 2014

The  **Moscow Times**

Russia's Central Bank said Friday it had shifted the boundaries of its floating ruble corridor by 30 kopeks, following market interventions to curb the pace of the currency's decline.

As of Oct. 16, the new corridor extended from 37.25 to 46.25 against a dollar-euro basket, compared to 36.95 to 45.95 previously.
