

In Photos: Partial Solar Eclipse Shines Over Russia

October 25, 2022

The last partial solar eclipse of 2022 was visible in the skies over much of Europe on Tuesday, including Russia. The moon's shadow reached its peak in the southern Urals city of Chelyabinsk, where residents could see 79% coverage at around 4 p.m. Russians across the country stepped outside to catch a glimpse of the moon passing in front of the sun:
